

## self

who or what is the »self« in »selforganizing systems«?

–

– / –

– /–/–

– –/ –/–

the self –

that is perhaps

the and any between

the and any silence

the and any listening

the rest and any break

the yearning for something

the expectation of anything

the "wey" between we and they

the between which happens among

and within the tiny minute moment in

between that which had happened

and that which will happen

the not done but happened

working within the void

which is it's home

it's not a who

it's a how

the self

is how

how
